

Exercise and Sport Science

School of Health and Human Performance

Mission Statement

The Department of Exercise and Sport Science seeks to:

1. Equip students for careers in sport-and exercise-related professions.
2. Enable students to view knowledge in light of scriptural truth.
3. Help students apply and model knowledge to the vocation and world in which they work and live.
4. Encourage growth in Christian character.

Personal Requirements

Students planning to pursue a major within the Department of Exercise and Sport Science are best prepared in high school by taking a college preparatory curriculum. Students planning to pursue a multi-age physical education major should take as many physical education courses as possible. Those considering majors in exercise science should take biology, chemistry, physics, and mathematics courses at least through Algebra II. Business courses such as accounting and economics are good preparation for students considering a major in sport management.

Department Requirements

Once students declare a major within the Department of Exercise and Sport Science, they are expected to maintain a high level of personal physical fitness. A semi-annual 1 1/2 mile run is used to evaluate the status of the student's fitness.

Multi-Age Physical Education and Physical Activity and Sport Studies majors have courses in their respective curricula that have motor skill performance proficiencies. While meeting the proficiency standards is not required to receive a passing grade in all classes, satisfactory completion of all of the proficiencies is a degree requirement. See pages 78 and 79 for the Department of Education admission and retention requirements for Multi-Age Physical Education and Multi-Age Health Education.
