

10. Evaluations

Purpose:

Evaluations come from your clinical/field experiences and should highlight your strengths in a variety of settings.

Suggestions:

You may want to organize these evaluations to reflect the order/progress of your teaching experiences and preface them with some sort of explanation or reflection. Only choose your best evaluations and limit these to a number that adequately covers your experiences.

You may copy evaluations (for 10¢ per copy) which are kept in your files in the education office and use the originals in your portfolio.
