

14. Other

Purpose:

The required list of items are the bare bones of a professional portfolio. While it is certainly possible to go overboard and include an unmanageable amount of material in a portfolio, we do encourage you to add other items as listed in the TEP handbook.

Suggestions:

Throughout your professional portfolio you have the opportunity to present your best self. This will be evident in your neatness and organization, correctness of grammar, and creativity. Although everyone will have the required items included, we hope that you will be able to demonstrate your individuality and special strengths in this portfolio by both the things you include and also the format you choose.
