

Mac OSX: cu-secure Wireless

NOTE: *If you are running an older version of Mac OS (OS X 10.4 Tiger and earlier), please stop this process and bring your computer to the Computer Assistance Center (located in the Tyler Digital Communication Center) for support.*

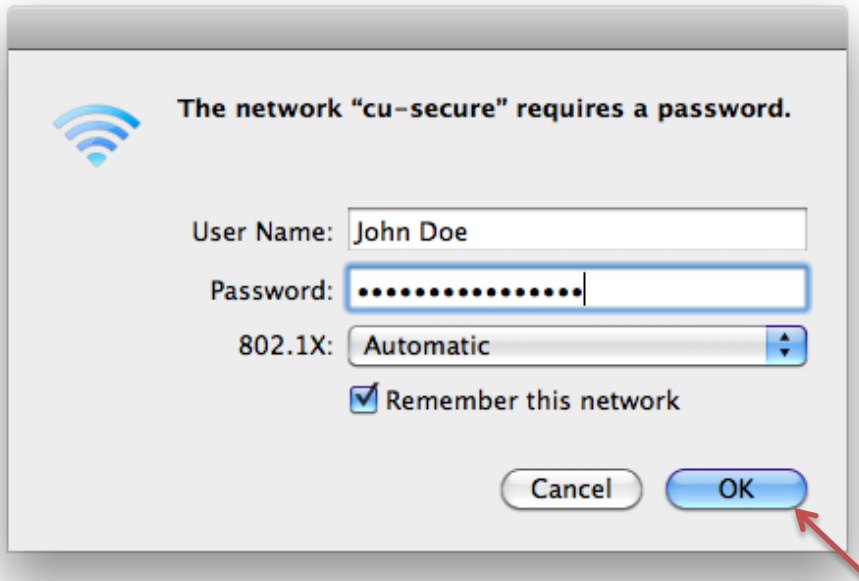

1. Airport service should be turned on by default to automatically detect available wireless networks. If not, turn it on.

2. Click the wireless icon in your upper toolbar and select cu-secure.

3. Log in using your CedarNet username and password. Click **[OK]**. If you do not remember your CedarNet username and password, please contact Information Technology at extension 7905 from any campus phone for assistance.

4. If you are asked to 'Verify Certificate' click **[Continue]**

5. Congratulations! You are now finished with the Mac device cu-secure wireless setup. If you are still having difficulties with your wireless connection, please feel free to call (937)766-7905, or come by the Computer Assistance Center for further support.
