Cedarville University Guest
Computer Access Guide

Step 1 – CedarNet Username and Password

Welcome to Computing at Cedarville!

If you are visiting as part of a camp or conference, your host may assign a temporary CedarNet username and password to you during check-in (e.g., username: TEMP3000, password: wezvuy).

With these login credentials, you can access the Internet using any University-owned computer. You can also use the credentials to access Cedarville's wireless network using your laptop.

If you need any help logging in, please contact the Help Desk between 8am-5pm at (937)766-7905 or dial 7905 from any campus phone.

> **Parents** can obtain a CedarNet username and password when their student runs a "Parent Access" transaction through CedarInfo.
> Note that the primary purpose of parent access is to grant parent access to student financial and transcript information.

Step 2 – Connect Your Self–Provided Computer (SPC)

This guide refers to a laptop brought from home as an SPC (self-provided computer). The following instructions will assist you in getting your SPC connected to CedarNet (the network).

Wired Connection

If you are staying in the residence halls, each dorm room has two network ports available for your use.

To access CedarNet using a wired connection, **attach** a CAT5 (or CAT6) Ethernet patch/network cable to the network port on your SPC, and then **insert** the cable into the active network port in the wall.

Physical ports are always "on," so once you have plugged in the network cable you will be connected to CedarNet. **Log in** using the temporary username and password that you were assigned.

Wireless Connection

The following table illustrates the wireless options that are available during your visit to Cedarville University.

	What Cedarville University Requires		What Guests Receive
Wireless Network	**Username/Password** (required)	**Computer Registration** (required)	**Encrypted** (more secure)
cu-unsecure	Yes	No	No
cu-secure	Yes	Yes	Yes
cu-manual (gaming & mobile devices)	Yes	Yes	Yes

CU - Unsecure Network

1. Enable **wireless** on your SPC and connect to the **cu-unsecure** wireless network.
2. Open an Internet browser (e.g., Internet Explorer or Safari) and enter your temporary **username** and **password** when prompted.
3. You may need to **log in** a second time at the "Cedarville University Internet Access Login" screen.
4. If you are using Internet Explorer, click **Continue to this Website**. You should be all set!

CU – Secure Network

If you require a more secure wireless connection, please contact the Help Desk between 8am-5pm at (937)766-7905 or dial 7905 from any campus phone. We are happy to help you with the SPC registration process.
