Cedarville University is in the final stages of its fundraising effort for the new Health Sciences Center. Many have joined us to help influence the lives of future health care professionals through rigorous academic and biblically based programs.

As we enter the homestretch of the campaign, we invite you to shape the future of health care by investing in Cedarville’s nursing and pharmacy students. Your gift will touch hundreds of students today and extend to each life they will touch as health care providers for years to come.

In recognition of your pledge of $500 or more, Cedarville will engrave a brick in your honor with the wording you choose. Your brick will be placed in the beautifully landscaped terrace garden overlooking a natural wetland outside the new Health Sciences Center.

To help Cedarville successfully finish the Health Sciences Center campaign and influence a generation of young health professionals, please complete and return the following pledge form.

Thank you for helping Cedarville to become a national leader in innovative and holistic health care education.

Sincerely,

William E. Brown, Ph.D.
President
